

When it Comes to Health Care, California's Health Plans Have You Covered

Health plans are offering the essential benefits that matter most to Californians.

California Health Plans are covering:

- ✓ Over 90% of prescription drug costs
- ✓ Hospital stays
- ✓ Preventive services like wellness checkups, vaccinations and health screenings for cancer, high cholesterol, depression and type 2 diabetes, among many other services
- ✓ Maternity care to best support Californians throughout their journey of pregnancy, labor, and delivery, and also provide coverage for newborns, ensuring that babies receive the best start in life
- ✓ Mental health services, including behavioral health treatments such as psychotherapy and counseling, standardized screening and treatment in primary and emergency care
- ✓ Critical COVID-19 screening, testing, vaccines, and treatment to keep our communities safe from the coronavirus and its ever-evolving strains

And much more

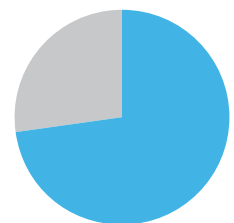

California is home to world-renowned doctors, hospitals, and health care systems. Health plans guide their members to leading providers, innovative treatments and services to best suit the unique needs of their individual members.

California's Health Plans are Providing Affordable Health Care Coverage, Quality Care, Choices in Providers, and Comprehensive Benefits for Californians

Californians have access to affordable health care coverage through a variety of options – their employer, a family member, Covered California, Medi-Cal, and Medi-Care.

Nearly 3 in 4 Californians say they are satisfied with their current health plan.

Seven in ten (73%) California voters are satisfied with the health care they receive.
