

California's Health Plans and CalAIM

California's Medi-Cal Managed Care Plans are partnering with the Department of Health Care Services (DHCS) on CalAIM — an innovative, multiyear initiative to improve health equity, quality of life, and health outcomes by evolving the Medi-Cal program.

Managed Care Plans have been an integral part of the creation of CalAIM, and through the new program, Medi-Cal enrollees will experience a more equitable, compassionate, and coordinated approach to health care.

California's Managed Care Plans will extend support and services for Medi-Cal enrollees beyond hospitals and health care settings and directly into California communities.

Population Health Management

to prioritize prevention and wellness for conditions such as asthma

Behavioral Health Services

to ensure that patients can get treatment whenever and wherever they seek care

Integrated Care

for seniors and people with disabilities

Medically Tailored Meal and Housing Services*

**optional services will vary by health plan*

Enhanced Care

for enrollees with complex needs

Medi-Cal Managed Care Plans are committed to advancing health equity and the CalAIM initiative is part of their continued efforts to improve health outcomes and reduce health disparities for enrollees.
